

## Skelton Flexsteel Shovels and Spades

One Piece—Solid Shank—Heat Treated

Sectional Cut Through Center

The blade, shank and socket of these shovels are formed from one solid bar of steel hammered into shape by the Skelton process under power hammers. There are no pieced together joints.

The straight handle and straight pattern handle socket make re-handling a very simple matter.

Skelton Shovels will not fracture or split under the hardest service. The thick center blades are tempered and hardened.

### Bull Dog Brand

#### No. B.D. 10 Square Point Black Finish

Size Number.....	2
Length of blade, inches.....	12 1/4
Width of blade, inches.....	9 3/4
Approximate weight, per dozen, lbs.....	60
